

REMARKS

This is to acknowledge that all of the claims in the above-identified application have been allowed, but that the drawings were objected to on the grounds that they allegedly fail to show a multilayered printed circuit board as referred to, for example, in Claim 8. The disclosure of such a multilayered printed circuit board is set forth in the Specification commencing, for example, at Page 35, line 12, wherein it is pointed out that Fig. 8 of the drawings shows a "wiring 13 ... on the other wiring layer". This is shown in Fig. 8 where printed circuit board conductor 13 is shown on a different layer than the conductors with which it intersects without connection. Alternatively, as discussed at that same portion of the Specification, the wiring 13 may be "on the back side of the printed board".

For these reasons it is respectfully requested that the requirement for a Drawing Amendment be withdrawn and that a formal Notice of Allowance be issued.

Applicants' undersigned attorney may be reached in our New York office by telephone at (212) 218-2100. All correspondence should continue to be directed to our address given below.

Respectfully submitted,

Attorney for Applicants
